

Collector

universal air distribution box

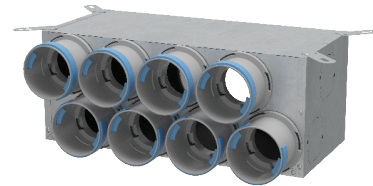

The universal air distribution box - collector was created to make a product accessible to everyone. The collector is convenient and easy to install, has four mounting points that can be adjusted to your preferred angle. The inside of the box is coated with an anti-condensation material, which prevents condensate formation and ensures tightness.

**Standard air distribution box
160-12x75 body**

Product code: K1DN16012

**Standard air distribution box
160-12x75 body with 8 flanges**

Product code: K1DN16012-8

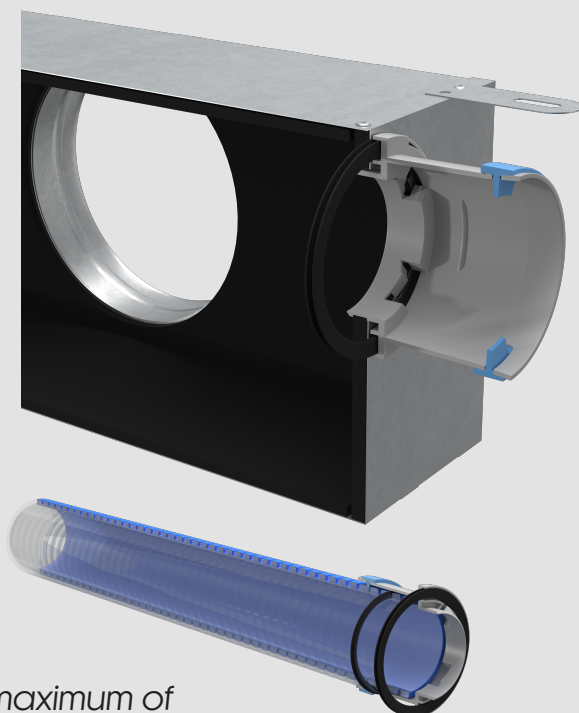

Purpose and benefits

- Collector is designed for distributing airflow through ducts into specific premises.
- It is suitable for connecting flexible ducts with a diameter of DN75 mm.
- Universal - it can accommodate as many flanges as needed. It can support a maximum of 12 flanges.
- It features a dual fixation system - "click" and plastic fixators. Strong flange attachment to the collector body.
- Convenient installation with 4 mounting points that can be adjusted to your desired degree. The elongated oval cavity allows maneuvering.
- The interior of the air distribution box is lined with anti-condensation insulation, which also ensures protection against possible condensation but also ensures the overall tightness of the box.
- Compact – very easy to transport. It takes up 2-3 times less space than usual distribution box when flanges are put inside.

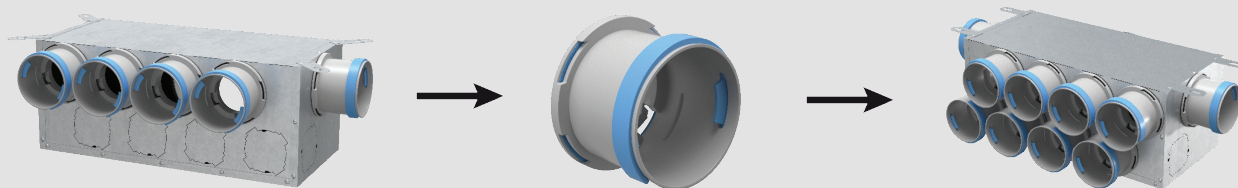

Reliable fixing system

- The flanges in the collector have 'click' fixings that prevent duct from slipping out easily. These fixings are compatible with many manufacturers' ducts. In case the flange is not securely fixed using the first method, you can use a second fixing method - a plastic fixator. The flange is firmly fixed to the air distribution box.

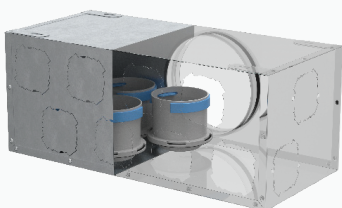

Universality

- It has the capacity to accommodate a maximum of 12 flanges

Compactness

Comfortable mounting

Anti-condensation insulation

Measurements: 200x180x440 mm (WxHxL)

Package includes:

- Air distribution box body
- Flange DN75 (available upon request)
- Fixator DN75 (included with flange)
